THE CHORD HARP

We have been tinkering with a design for a simple, chorded zither for a long time. Inspired by a Chambered Nautilus encountered on one of his tropical adventures, Jerry awoke in the middle of the night with the idea of crossing the strings. And it worked!!

The **Chord Harp** is perfect for sing-a-longs around the campfire or at family gatherings. You can learn to accompany yourself as you sing simple folk songs without having to learn complicated fingering patterns. Each group of strings is tuned to make a chord. The chords are laid out in such a way that you can play hundreds of familiar songs in 2 different keys. Choose the key that best fits your voice.

FEATURES

- 23" x 12" x 2"
- Weight: 5 pounds
- 20 strings (4 chords)
- Chords: D7 - G - C - F
- Rosettes Included
- Solid hardwood sides
- Plywood top and back
- Kit difficulty level 

If you have access to some woodworking tools, you'll be successful building our **Pre-Cut Chord Harp Kit**. We provide easy to follow, step by step instructions with plenty of illustrations to guide you through the project from start to finish. You can expect to spend about 8-12 hours on assembly. You'll need a dozen clamps, a belt sander, an orbital sander, a drill press, woodworkers glue, and the finish of your choice.

New book by clinical harpist Lynda Kuckenbrod - **How to Play the Chord Harp**

This book provides charts, diagrams, and general information about tuning, how to hold it, strumming and picking patterns as well as a collection of songs.

VOYAGEUR HARP

Cherry harp shown with optional rosettes. Order 2 large for the sides and/or 2 small for the neck. Rosette styles on page 27.

The **Voyageur Harp** represents the perfect combination of style, tone, portability and price. Big impressive sound with a full bass, rich mid, and lively treble. Nice consistent tone from top to bottom. Whether you are a gigging harpist playing weddings all summer or just starting out - this is an affordable harp that will meet your needs.

Available in cherry or mahogany. Choose cherry for a rich, elegant look or mahogany if you want to keep the weight down.

FEATURES

- 33 strings
- Range C2 to G6
- 56" tall, 27" deep, 14" wide
- Weight: 24 pounds - cherry
20 pounds - mahogany
- Woods: Cherry or mahogany body, neck & pillar, 6-ply aircraft birch soundboard
- Kit difficulty level -

Building the **pre-cut kit** is a very rewarding experience. The Voyageur Harp kit brings together all of the lessons we have learned in over 35 years of designing harp kits. You can assemble this harp in about 20-30 hours using mostly hand tools. A router is helpful for rounding corners, but an electric hand sander would do the job as well. Building this kit represents a real cost savings and you will end up with a performance quality harp.

We also offer this harp **in-the-white**. You just do a final sanding, do any decorating you might like, apply a finish, and install all the hardware and strings.

WWW.HARPKIT.COM/VOYAGEUR

This CD by local harpist, Hannah Caroline features several familiar melodies played on our Voyageur Harp. Hannah is a local favorite at the Renaissance Festival every year.

CDFLOWERS CD: FLOWERS OF THE MOUNTAIN \$15.95

My voyageur harp is simply lovely; its sound is outstanding! My harp teacher was amazed with its sound. I'll end with her words of praise for your voyageur harp: "lovely and remarkable!"

Sister Wilma

SMARTWOOD HARP

FEATURES

- 29 strings
- Range G2 to G6
- 52" tall, 27" deep, 11" wide
- Weight: 15-1/2 pounds
- Woods: Poplar sides, laminated birch neck, maple pillar, 6-ply aircraft birch soundboard
- Kit difficulty level:

The **Smartwood Harp** is our smallest floor harp, designed especially for students and beginners. We are confident that this is the most harp you can get for your money anywhere. There is plenty of sound and a 4 octave range that will cover most folk harp repertoire.

My daughter is enjoying her Smartwood harp very much! It was an instant hit for Christmas! It is a beautiful instrument too.

Thanks for the great work!

-Alyssa

The **pre-cut kit** is a 15-20 hour project that has been greatly simplified because of our easy bolt-together neck configuration. The body can be assembled using mostly hand tools although a router (optional) does speed up the project.

We offer the Smartwood **in-the-white** as well. This configuration means the body has been assembled by us. You will apply the finish, bolt the neck together, and install the hardware.

This is our only harp we offer **finished but unstrung**. Order this version and all you will have to do is bolt the neck together and install the strings.

SMARTWOOD HARP UPGRADE POLICY

We understand that as students progress they may wish to upgrade their harp. We will give you credit for the amount you paid for the Smartwood Harp (including levers) toward the purchase of a bigger harp or harp kit from Musicmakers. Offer good for 3 years from date of purchase.

Regency Harp
Cherry

REGENCY HARP

FEATURES

- 34 strings
- Range C2 to A6
- 62" tall, 29" deep, 16" wide
- Weight: 37 pounds
- Woods: Cherry body, neck & pillar
6-ply aircraft birch soundboard
- Kit difficulty level: 

People appreciate the classic design and visual appeal of the **Regency Harp**. It looks quite regal because of the large platform at the bottom. Despite the heft of this harp, it is supremely balanced so as to feel almost weightless while playing. Many harpists tell us that this model is one of the best sounding folk harps on the market today.

Building this harp from our **pre-cut kit** is an immensely rewarding experience. Your friends simply won't believe that you could build such an exquisite musical instrument.

Expect to spend at least 40 hours assembling this kit. You'll want a large work table, a few clamps, an electric hand drill, and power sander along with the normal supply of hand tools. As with all of our kits, you will need to supply the wood working glue and a varnish. (see page 29 for our finish kit)

The kit went together with only one or two "memorable moments". The results are better than ever I could have dreamed. When I played it the first time in our church, the audio technician exclaimed, "You bought one with the amplifier and speaker already inside!" No, it's just a Regency with full natural sound.

- Ken

LIMERICK LAP HARP

FEATURES

- 26 strings, nylon or wire
- Range: C3 to G6
- 31" tall, 23" deep, 13" wide
- Weight: 12 pounds
- Woods: cherry
- Kit difficulty level: 

The **Limerick Lap Harp** features a traditional Irish shape, an impressive range of 26 strings, and plenty of sound. Now you don't have to sacrifice sound quality with a small, portable lap harp.

Pre-cut kit

The **pre-cut kit** for this harp is greatly simplified because we have already glued the neck and pillar together and all of the tuning pin and bridge pin holes have been pre-drilled.

Your job will be to assemble the body. You'll want a few clamps for this. Sand, finish, install the hardware and strings and you have yourself a great lap harp! Expect to put in about 20-30 hours.

All harp components from sides to neck and pillar were superbly fashioned with complete accuracy. The instructions included were very much like a correspondence course in harp-making with all of the steps clearly laid out, and an abundance of technical tips to enhance success.

-Gary

Shown with optional Levers

GOTHIC HARP

FEATURES

- 31 strings
- Range E2 to G6
- 60" tall, 24" deep, 18" wide
- Weight: 22 pounds - cherry
- Woods: Cherry body, neck & pillar, 6-ply aircraft birch soundboard
- Kit difficulty level: 

Our **Gothic Harp** represents what most people imagine when they think of a harp. It has classic lines, elegant curves, and a warm, mellow tone. Nylon strings throughout make this harp incredibly soothing and easy to play.

We have been building this model for over 25 years and it has proved to be our most stable harp, requiring less tuning than any other model. The stability comes from a combination of lower string tension and the slight curve built into the soundboard and back piece.

Harp is shown with optional levers. Any Musicmaker's harp can be fully outfitted with sharpening levers. Check out page 10 for more information.

I built my harp with absolutely no woodworking experience. I didn't understand at the time what a meaningful project it would be, but it has been a very powerful part of my life as a harpist to learn to play on an instrument I built. Thank you for all that Musicmaker's Kits does to help facilitate this relationship between musicians and their instruments.

Best
Jennifer

Building the **pre-cut kit** is more challenging than others due to the curves built into the soundboard and back. You'll want an extra pair of hands to help install these pieces. You will also want a large work table, a half dozen clamps, electric drill, power sander, and a jig-saw, along with normal household tools.

Blueprints for this harp are available for the serious woodworker looking for a challenge!

Price includes carving on each side. Rosettes are extra.

SHARPING LEVERS

MORE INFO INCLUDING ASSEMBLY VIDEOS ONLINE AT
WWW.HARPKIT.COM/LEVERS

Harp are diatonic instruments. This means that, without re-tuning, they will only play in one key. **Sharping levers** are added to harps so you can quickly change keys without re-tuning the harp.

Every Musicmakers harp can be completely outfitted with sharpening levers. If you are able to successfully build one of our harps from a kit, you have the skills to install these levers. We provide excellent installation instructions for each brand. The Universal levers are the easiest to install but the Loveland Levers aren't much more difficult and offer a more refined look.

Choose the installed option if you are ordering a finished harp.

Adding levers to your harp makes the instrument more versatile and allows you to play many different styles of music in nearly any key.

LOVELAND LEVERS

Loveland levers have been around for years and are known for excellent tone, being trouble free and easy to regulate. The brass bracket and black plastic handle look clean and elegant.

LEVER1	LOVELAND LEVER	\$14.99 EA.
LEVERON1	INSTALLED LOVELAND LEVER	18.99
TOOLS1	INSTALLATION TOOLS	11.00
LEVER1REG	LOVELAND LEVER REGULATION KIT	21.00

UNIVERSAL LEVERS

This solid metal lever is known for its ease of installation and excellent tone. Available in Black or Gold. One size lever fits all strings!

LEVERU	UNIVERSAL LEVER	\$12.99 EA.
LEVERONU	UNIVERSAL LEVER - INSTALLED	16.99

Gold

Black

Voyager harp shown with Universal Levers. Gold color on the F and C strings.

Easy to install on ANY harp!!

HARP LIGHTS

Add some dramatic lighting to your harp! Perfect for a candlelit performance or as mood lighting in your living room. Bright enough to light your strings and sheet music so you can play with no other light source.

These self-adhesive lights are **simple to install**. Just “peel and stick” the lights under the neck of your harp. Power is supplied from a 9 volt battery or by the *optional* AC adaptor. Wiring connections are “plug and play”. No soldering required!

The battery and most of the wiring is easily hidden inside the body of the harp and held in place with adhesive backed velcro.

LEDDIMMER	REMOTE SWITCH AND DIMMER	39.00

This ingenious music stand-without-the-stand attaches directly to the pillar of your harp. Adjustable in height and tilt, the Harp Desk grips the pillar with cork padding, so **it will not mar the finish of your harp.**

The harp desk is quite sturdy and will easily bear the weight of a 3-ring binder filled with music.

Available in two sizes. The standard size works great for normal song books. The mini size is great for tablet devices or single-sheet music.

Please specify size when ordering.

New iPad holder adjusts to move iPad closer or further away from player. Works with all iPad models except the iPad Pro. Not compatible with other tablets.

NOTE: Order IPAD-1 if you already own a harp desk. It will attach to your existing bracket.

HARP DESK

Price includes rosette. Select a style from page 27
Desk frame available in cherry or walnut.

The **Harp Desk Kit** is a good project to build at home. You will glue the four pieces of the clamp together, glue the desk to the ledge, round over the sharp corners, sand, finish and install the cork. You can download the complete assembly instructions from our website for a step by step preview of the process.

Wheels are a must for people who take their instruments out of the house.

The platform slides into a pocket in the bottom of our gig bag, or can be strapped under the harp without the case. Includes a brake so you can stop and play even with the wheels on.

People that play their harps in hospitals or elder care facilities love these wheels. No more lugging your harp from room to room. Just release the brake, tilt the harp back and roll away. The 7" wheels easily handle small bumps like elevators and door jams.

Wheel Sizes for Musicmaker Harps

Gothic • Medium
Regency • Large
Voyager • Small

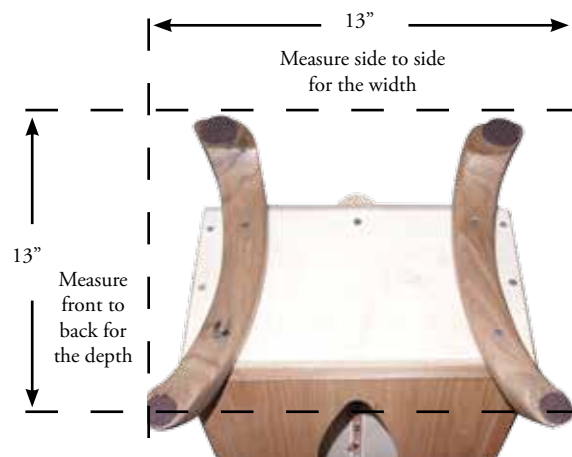

HARP WHEELS

ITEM	DESCRIPTION	PRICE
WHEELS-SM	SMALL SIZE • 13" WIDE X 14" DEEP	\$159.00
WHEELS-MD	MEDIUM SIZE • 16" WIDE X 15" DEEP	159.00
WHEELS-LG	LARGE SIZE • 18" WIDE X 15" DEEP	159.00

Shipping surcharge on wheels to Canada/Alaska/Hawaii - \$20.00

HARP WHEELS

If you don't have one of our harps you just need to measure the width and depth of the contact points on the base of your harp and select the wheel size that will accommodate your measurements. See the picture below for an example.

This harp measures 13" by 13" so the small size wheels would be the best fit.

Mandocello
same body shape used for **Parlor Guitar** and **Octave Mandolin**

Baritone Ukulele

Concert Ukulele

Mandola

Mandolin

Instruments shown with optional inlay banding (pg. 27).

*We can install inlay banding on finished or in-the-white instrument for \$100.

The **Parlor Guitar** is slightly smaller than a standard dreadnought acoustic guitar. We like the proportions of this size instrument and how easy it is to play.

The **Octave Mandolin** has a rich sound you have to hear to believe. Uses the same chord shapes and fingerings as a standard mandolin. This instrument will add color to an ensemble.

The **Mandocello** has the lowest tuning of all the Dakota Instruments. Same tuning as a cello but no bow required. You won't want to put this one down!

The **pre-cut kits** for the Dakota Instruments are highly refined projects with beautiful woods and lots of customizing options for inlays, rosettes, and finishes. When finished, these kits make professional quality instruments with impressive tone and playability.

The parlor guitar kit parts are shown to the right. All of the Dakota instruments are rated at 4 hammers because of the level of involvement and the attention to detail that is required for assembly. Expect to put in 40+ hours to complete one of these instruments. You'll want to take your time and give this project your best effort because you are going to have an instrument that you will cherish and play for years to come.

If you don't have the time or desire to build a pre-cut kit, consider the **in-the-white** option. You'll get the instrument already assembled but you will do a final sanding, apply a finish, and install the hardware and strings. Faster yet, just order the **finished instrument** ready to play!

Parlor Guitar Kit

CONCERT UKULELE

- 4 strings
- Tuned GCEA
- Scale Length: 14"
- Overall Length: 24"
- Weight: 1.5 pounds

UKULELES

The **Concert Ukulele** is the most common size ukulele. It is one of the easier fretted instruments to learn how to play and is popular with all ages and for all styles of music.

BARITONE UKULELE

- 4 strings
- Tuned DGBE
- Scale Length: 19"
- Overall Length: 30"
- Weight: 2.2 pounds

The **Baritone Ukulele** has the ease of playability as the concert uke, but is tuned lower. Tuning is the same as the highest 4 strings on a guitar so you can use the same chord forms.

MANDOLA

FEATURES

- 8 strings
- Tuned CGDA
- Scale Length: 17"
- Overall Length: 31-1/2"
- Carbon Fiber reinforced neck
- Weight: 2.5 pounds

The **Mandola** is tuned a 5th lower than the mandolin. It has a slightly longer scale length and produces a warm timbre. You use the same fingerings and chord shapes as on the mandolin but they will be named differently.

The **Mandolin** is a beautiful instrument with a clear, warm, and even tone. The treble is distinct and will cut through the mix without being harsh.

Gold inline tuners and matching gold tailpiece come standard, as does the walnut peghead veneer.

MANDOLIN

FEATURES

- 8 strings
- Tuned GDAE
- Scale Length: 14"
- Overall Length: 28"
- Carbon Fiber reinforced neck
- Weight: 2 pounds

MOUNTAIN DULCIMERS

The **Mountain Dulcimer** is a true piece of American Folk Art. The instrument comes to us from the southern Appalachian Mountains which is where it gets its other common name, the Appalachian Dulcimer. Its long history and continued popularity are due to the fact that the instrument is relatively easy to build and simple to play. The sound is pure, sweet, and as simple as the pastoral pleasures these instruments evoke.

Folks have been making these by hand here in America since the 19th century. Musicmakers has made it easy for you to join this rich tradition with two different styles of mountain dulcimers. The hourglass style is a more traditional shape and the teardrop style is slightly easier to build.

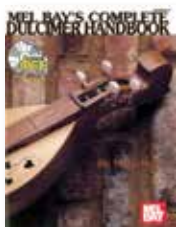

Expect to spend between 20-30 hours building from our **pre-cut kit**. Adding some decorative inlay banding (page 27) around the edge is great way to customize this project. You'll need a router if you want to do that.

I finally finished my second dulcimer. I have enjoyed building the second as much as the first. Hope to see you in September to purchase more supplies. Keep up the enthusiasm and contact with your customers. Thank you.

Don Brodowicz

HAMMERED DULCIMER

Shown with optional medium rosettes (page 27)

Adjustable stand sold separately

FEATURES

- 66 strings, steel and bronze wound
- 17/16 bridge layout
- 19" wide at top, 40" wide at bottom
- 19-1/2" front to back, 2-3/4" deep
- Solid mahogany top
- Maple frame
- Weight: 17.5 pounds
- Kit difficulty level: 

The **Hammered Dulcimer** is a fascinating instrument to play. You strike the strings with hammers and each note rings out beautifully, making even simple, unadorned melodies sound rich and full. The rhythmic possibilities inherent in the striking style of the hammers make this a fun percussive instrument too.

Our **pre-cut kit** takes about 20-30 hours to build. You'll want a good supply of clamps, a power sander, and a drill press for this project. You can order medium rosettes (page 27) for the soundholes or cut out your own design. Installing all 66 strings is a wonderful way to cultivate patience.

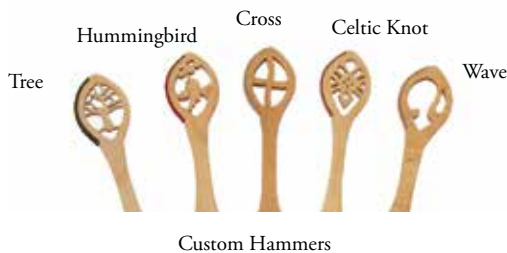

I have been extremely pleased with the 17/16 hammered dulcimer built from your kit and on the service provided by you and your staff. As a retired "bean counter" who had never built anything in the past, I was not sure if I would manage to build a musical instrument, but your kit instructions and the kit itself made it relatively easy.

Regards
Bill

I have been playing the reverie harp at least once a week since January during meditation class. Without exception, everyone in the class has expressed appreciation for the deep state of grace that the sound from this instrument brings to them in their meditation. Another way I have been blessed by the harp has been during my visits to a local hospital. It has been such a gift to me to feel joy when I look in their eyes while I play for them. I could go on, but suffice it to say that your gift has changed my life in ways I cannot express adequately in words.

Thank you and Love always,
Claudine

REVERIE HARP • PRE-CUT KIT • \$369

We offer the Classic Reverie Harp as a pre-cut kit for people to assemble and finish at home. This project is perfect for the hobbyist who has a drill press, a router, belt sander, and at least a dozen clamps available.

People are impressed with the fit of the parts and the clarity of the assembly instructions. A finely crafted kit.

REVKIT CLASSIC REVERIE HARP • PRE-CUT KIT  369.00

The Reverie Harp Kit went together with success, even for someone without a lot of woodworking skills or background. We are finding it very beautiful to look at and soothing to play. It will be used in a hospice situation and we're really looking forward to sharing it with the patients and staff.

The Reverie Harp

Make soothing music. No practice required.

A. Classic Reverie Harp

B. Reverie 2

C. Reverie 2 Deluxe

FEATURES

- 22 strings, steel
- Pentatonic tuning
- 20" long, 12-1/2" wide
- 4-1/2 pounds
- Solid mahogany soundboard (Classic and Rev 2 Deluxe)
- Solid cherry frame (Classic and Reverie 2 Deluxe)
- Birch plywood top (Reverie 2)
- Poplar frame (Reverie 2)

The **Reverie Harp** is a type of psaltery that we designed specifically for therapeutic applications. It is tuned so that there are no wrong notes which means that ANYONE can make beautiful, soothing sounds on this instrument.

Caregivers all over the world are finding the Reverie Harp to be an invaluable tool. It is being used in children's hospitals, senior care facilities, memory care units, Veteran's hospitals, counseling clinics, Hospice care, and many other settings.

It is equally suited to provide care for the care-givers. Just 10 minutes of sitting quietly, cradling the harp against your chest and enjoying the soothing sounds can provide a wonderful respite from a stressful life.

How is the Reverie Harp played?

The simple answer is: You play the Reverie Harp however you want. There are no wrong notes! You can:

- close your eyes and just strum the strings
- pluck individual strings
- pluck any two or more strings together
- strum it with a pick
- tap the strings with a pencil
- strum all the strings

However you choose to play the Reverie Harp - it will sound good.

HOGNOSE PSALTERY

Our **pre-cut kit** is about a 10 hour project requiring some clamps, a hand drill, and normal hand tools. This is a great project to decorate. The optional large rosette (page 27) is just one way to decorate the soundboard.

Order this **in-the-white** and we assemble and drill the kit for you, leaving the finishing and stringing for you.

FEATURES

- 15 strings, steel
- Range: C4 to C6
- 28" long, 10" height
- Laminated birch top
- Hardwood frame
- Weight: 2-3/4 pounds
- Includes set of 8 songsheets
- Kit difficulty level: 

The **Hognose Psaltery** continues to be a popular choice partly because it makes for a gentle introduction to musical instrument building. It is also a great instrument to introduce children to the musical scale. Or use it to add a nice touch to period plays and festivals.

BOWED PSALTERY

The **Bowed Psaltery** sounds much like a violin, but each note has its own separate string. The natural notes (white keys on the piano) are on the right side, and the sharps and flats (black keys) are on the left side. Just bow along one edge or the other to play the notes you want - no fingering required!

Includes a "camera mount" on the bottom so it can be attached to a tripod for two handed bowing.

The **pre-cut kit** is a 15-20 hour project and you'll want several clamps, a drill press, and an electric hand sander.

Order the bowed psaltery **in-the-white** and you can decorate, stain, and finish however you like before installing the hardware and strings.

FEATURES

- 32 strings, steel
- Range: C4 to G6
- 26" long, 7-3/4" wide
- Solid mahogany top
- Cherry or walnut frame
- Kit difficulty level: 

Shown w/optional medium rosette (page 27)

The **Kantele** is a type of plucked psaltery from Finland. Though it only has 10 strings, you will find you can pull plenty of music out of this simple instrument. The tone has a quality that is entirely unique, sweet and evocative.

FEATURES

- 10 strings, steel
- Range: A3 to D5
- 33" long, 7" wide
- Weight: 2-1/2 pounds
- Solid mahogany soundboard
- Solid walnut frame
- Rosette included (see page 27)
- Kit difficulty level:

The **pre-cut kit** is a 6-8 hour project and fairly simple. You'll need a few clamps to assemble the frame and a drill to make the holes for the tuning pins. A power sander and/or router will also be quite helpful. Also available **in-the-white**.

KANTELE

Rosette included. Please select style from page 27

OLD WORLD LYRE

FEATURES

- 10 strings - nylon or steel
- Range: C4 to E5
- 25" tall, 15-1/2" wide
- Solid spruce top
- Solid walnut frame
- Weight: 2-1/2 pounds
- Kit difficulty level:

The design of this **Old World Lyre** is based off ancient etchings, with some modifications. It's great for period plays and historical re-enactments. Choose either nylon strings for a mellow, harp-like sound, or wire strings for a brighter tone with more sustain.

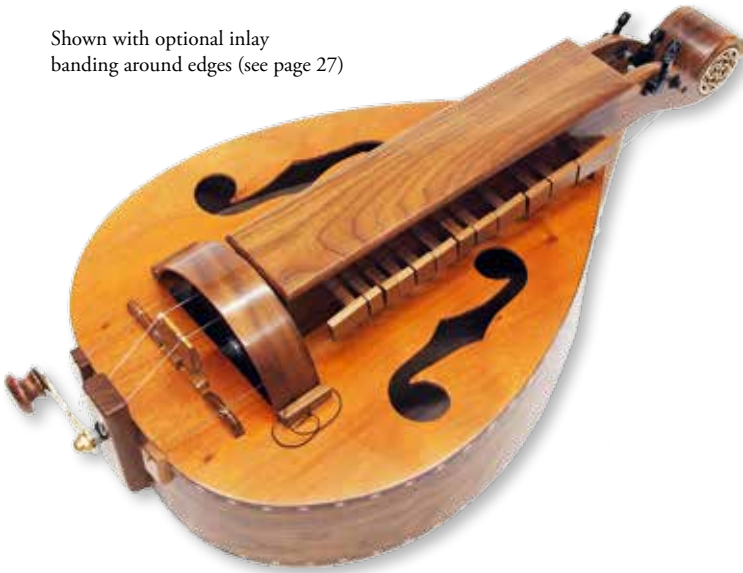

Our **pre-cut kit** parts fit together very well on this kit. You'll want a router for trimming the front and back flush with the curved body and for rounding over the edges. Expect to put in about 20-30 hours on this project.

HURDY GURDY

FEATURES

- 4 strings
- 12 buttons
- 28" long, 13" wide
- Solid mahogany top
- Walnut body
- Weight: 5-3/4 pounds
- Kit difficulty level

Enjoy the sound of bagpipes? Get the same sound from the **Hurdy Gurdy** without losing your breath. Just turn the crank to activate the rosin-coated wheel. Push the keys with your left hand to play melodies.

This is a fascinating reproduction from 16th century Europe. It has a diatonic scale spanning 1-1/2 octaves.

This is our most involved **kit** and requires patience and attention to detail. Use a router to add optional inlay banding, a scroll saw for cutting the sound-holes, a band saw for shaping the brass crank, and a buffing wheel for polishing the brass.

Optional: Add 2 large rosettes (page 27) for soundholes.

Small rosettes for peghead included in price. Select style from page 27.

GUITBK25
CLEARANCE PRICE

RENAISSANCE GUITAR

FEATURES

- 6 strings, steel or nylon
- 38" long, 15" wide
- 25.4" scale length
- Double action truss rod
- Black sealed gear tuners
- Rosewood fingerboard
- Solid mahogany top
- Walnut sides & back
- Weight 4 pounds
- Kit difficulty level:

Though not an authentic replica, our **Renaissance Guitar** has the the shape of a 17th century lute-style instrument. Adds authenticity to period festivals and events.

It plays just like a standard guitar, same scale length, tuning, etc. The large sound chamber and solid mahogany top provide a big, rich voice. Choose either steel or nylon strings. Works best with a strap!

Jumbo rosette included with kit (doily or celtic knot)

Our **pre-cut kit** can be assembled at home using common hand tools in about 30-40 hours. You'll want a router if you choose to add optional inlay banding around the edges (pg. 27).

STRUMBLY

What is Strumbly?

Simply put, Strumbly is the easiest fretted musical instrument you will ever play.

Strumbly has been one of our most popular projects since we introduced it in 2006. If you can count to ten, you can play Strumbly. We've heard from lots of people that were frustrated with guitar but found success on Strumbly. We have a play-by-number songbook written specifically for this instrument that includes over 125 songs.

FEATURES

- 3 strings, steel
- 25" long, 8" wide, 1-3/4" deep
- 1.8 pounds
- 23-1/2" scale length
- Rosette included (see page 27)
- Kit difficulty level:

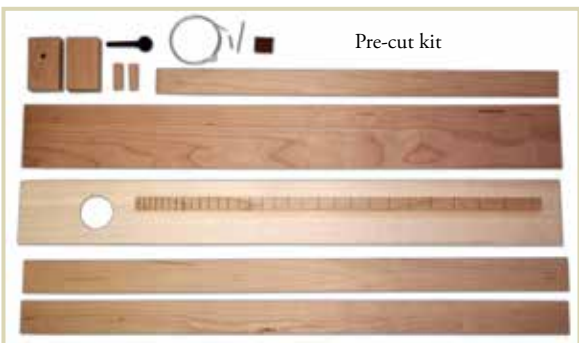

Our **pre-cut kit** is about a 10-15 hour project. You'll glue the frame to the neck which is greatly simplified thanks to the slots cut into the heel. Glue on the front and back and then trim and sand. The fret-slots are pre cut and the holes for the tuners are pre-drilled. Sand, decorate, apply some varnish, string it up and start strumming! Download the assembly instructions for a detailed preview of the assembly process.

STRUMBAG-S	PADDED GIG BAG	\$44.95
STRUMSTRG	SPARE SET OF STRINGS	4.50
STRAP2	STRAP WITH 2 BUTTONS	35.00
STRUMSONG02	STRUMBLY SONGBOOK W/125+ SONGS	20.95

The **Psalmodykon** is played by plucking the string or by using the optional violin bow. Each instrument comes with a "Transposition Stick" with numbering that corresponds to the two books listed below. This play-by-number system means that you don't have to learn to read music!

PSALMODIKON

FEATURES

- 1 string, steel
- Solid spruce top
- Cherry ply back and sides
- 32" long, 3-1/2" wide, 2-1/4" deep
- 1-1/2 pounds
- Kit difficulty level:

Rosette included. Please select style from page 27

Our **pre-cut kit** is quite easy to assemble. The most challenging part of this kit is installing the frets and sanding them flush with the edges of the fingerboard.

Also available **in-the-white** if you don't have the time or tools to assemble the kit. We leave the final sanding, decorating, and finishing to you.

MOUNTAIN BANJO

FEATURES

- 5 strings, steel or nylon
- 36-1/2" long, 12" wide
- 25-1/2" scale length
- Solid cherry body
- Cherry/walnut laminated neck
- Walnut peghead overlay
- Double action truss rod
- Planetary geared tuners
- Kit difficulty level 

The **pre-cut kit** goes together nicely. The solid hardwood body is already shaped and the neck is pre-fit to the body. You will design and cut out the shape of the peghead, install the marking dots on the rose-wood fingerboard, and tap the fretwire into the slots.

Our **Mountain Banjo** is a well proportioned, all wood banjo with a great feel and sweet tone. We offer plenty of options so you can set up this banjo just how you want. Steel strings or nylon, fretted or fretless - take your pick!

TENOR BANJO

FEATURES

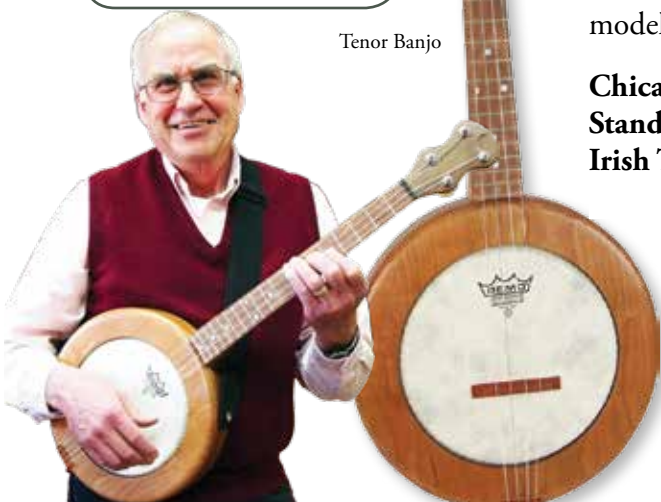

- 4 strings, steel or nylon
- 32" long, 12" wide
- 21-1/4" scale length
- Solid cherry body
- Cherry/walnut laminated neck
- Walnut peghead overlay
- Planetary geared tuners
- Kit difficulty level: 

We are pretty excited about our newest banjo offering - the 4 string **Tenor Banjo**. We use the same body as our Mountain Banjo but have a shorter, 4-string neck.

We have 3 different tunings available for this model.

- Chicago:** DGBE: (like a 4-strg. guitar)
- Standard Tenor:** CGDA (like a mandola)
- Irish Tenor:** GDAE (octave lower than mandolin)

CARDBOARD KITS

FEATURES

- 4 strings • 33" long • 25" scale length
- Kit difficulty level: 

Our cardboard guitars and dulcimers are very popular both at home and as school projects. The body pieces are laser cut so the shape of the instrument is just right everytime. The white cardboard is just begging for fun decorations.

You'll be amazed at the sound and durability of these instruments. Both kits use real geared tuners so they hold pitch extremely well and are easy to tune.

Cardboard Guitar Kit Parts

Kids can build a musical instrument in about four hours!

These cardboard kits are most suited to ages 9 and up but younger children will enjoy the projects too if they are assisted by an adult.

Each kit includes a simple songbook. Kids are much more motivated to learn to play an instrument they helped build! Our simple 2-chord song approach gets them playing real songs right away.

Discount pricing on 12 or more kits.

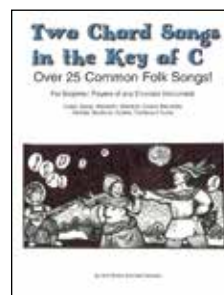

Decorating possibilities are endless. A trip to the craft store + your imagination = an instrument that is unlike any other.

Kayla and Kamran Nia with the cardboard dulcimers they made and decorated.

I have been having a lot of fun with these! Just ordered eight more for a Summer Camp!

Thanks, Philip Quest

CIGAR BOX UKE

We provide the cigar box, the pre-cut wood neck, and all the musical hardware and strings along with complete assembly instructions to build a working ukulele.

Have your own cigar box? Just order the hardware pack and pre-cut neck.

FEATURES

- 4 strings
- 20" long
- 14" scale length
- Tuning: GCEA
- Kit difficulty level: 

Micah is not quite five. He was able to help with the sanding, screwing the neck to the box (after I drilled the holes), holding one end of the strings taut while I tied the knots, threading the strings through the holes in the tuning pins, and turning the tuning key. It was his choice to mount the neck on the bottom of the box so he can open the secret compartment more easily. I glued on the toothpicks, broke off the ends and applied the hand-rubbed (tung oil) finish.

Thanks for the FUN PROJECT!
Peg

THUMB PIANO

Thumb Pianos, aka kalimbas, are a lot of fun to play. Pluck the tines with your thumbs to play melodies.

All of the projects on these two pages are rated at 1-2 hammers. They go together using regular household tools and only take between 4-8 hours to assemble. These are fun weekend projects and all are suitable for kids ages 10+ **Quantity discounts available.**

The best thing about these instruments is that they really play! We have designed all of these projects so that they make real musical instruments, not just toys.

The Thumb Pianos are a HUGE hit at our house! Our family loves playing music together. The girls have figured out "Heart and Soul" to play together :) Their piano lessons have taught them to use their ears to try to figure out different songs / melodies. We love the beautiful instruments we purchased from Music Makers! We will definitely encourage friends to check out your website. :)

-Krista

FEATURES

- 5-1/2" wide
- 7-1/2" long
- 15 tines (notes)
- Tuning: G4 - G6
- Kit difficulty level: 

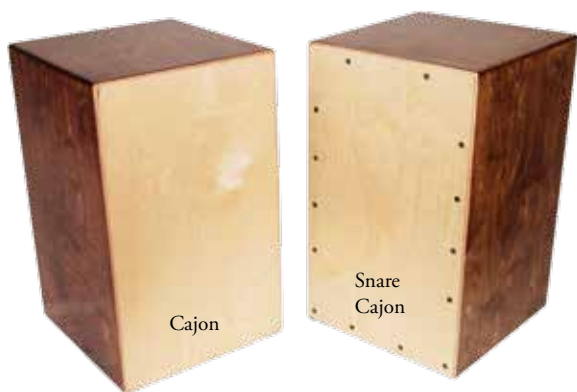

The **pre-cut kit** is a simple weekend project. It will take about 6-8 hours to glue the parts together, sand, apply a finish, and install the hardware.

 - Kit difficulty level: 

CAJONS

A best seller! Simple to build, endless decorating possibilities, and great fun to play.

All you need to assemble the **pre-cut kit** is some tape, woodworking glue, sand paper, finish and about 4 hours time.

We LOVE the cajon kit. LOVE IT. I have a small but very active Instrument Construction class, and they are having a great time putting this thing together. And all the musicians in the school cannot wait for them to finish so they can play it.

-Jason

Inlay around the edge of an instrument is a sure sign of excellent craftsmanship. Our inlay is about 1/16" thick and you'll need a router to cut the 1/16" ledge.

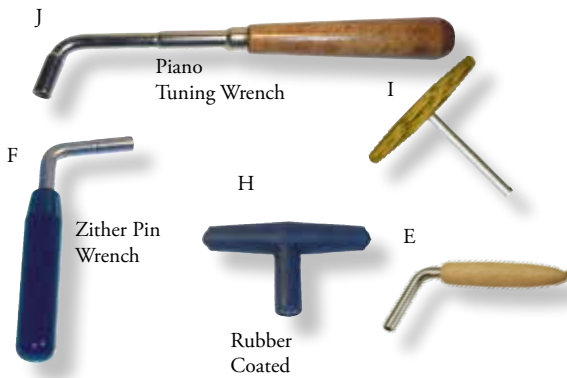

Using our router bit set makes installing this inlay a breeze. This is a side cutting bit with 2 roller bearings. Install the larger bearing to trim the edge flush and use the smaller bearing to cut the ledge around the body

ROUTERSET \$49.95

VARNISH

Wipe-on gel urethane is simply the best! No drips, no brushes to clean up, great looks, excellent protective coating in 5 easy steps:

- 1) Sand the wood smooth with 180 grit sandpaper.
- 2) Wipe on first coat of gel varnish to seal the wood, let dry fully.
- 3) Sand the dried varnish baby-smooth with 600 grit sandpaper.
- 4) Wipe on 2nd coat of gel varnish, let dry.
- 5) Repeat steps 3 & 4 until it looks professional, the more coats, the better!

The finish kit includes a foam applicator brush, sandpaper, and 1/2 pint of gel topcoat finish.

MUSICAL STRINGS

Our selection and variety of musical strings will help you get just about any instrument strung up!

If you are designing your own instrument you will find two extremely useful, free resources on our website to help you find the correct strings.

The **String Analysis Spreadsheet** provides valuable information on string tension and the article **Secrets of the Harmonic Curve** explains the "string window", saving you hours of trial and error and lots of broken strings.

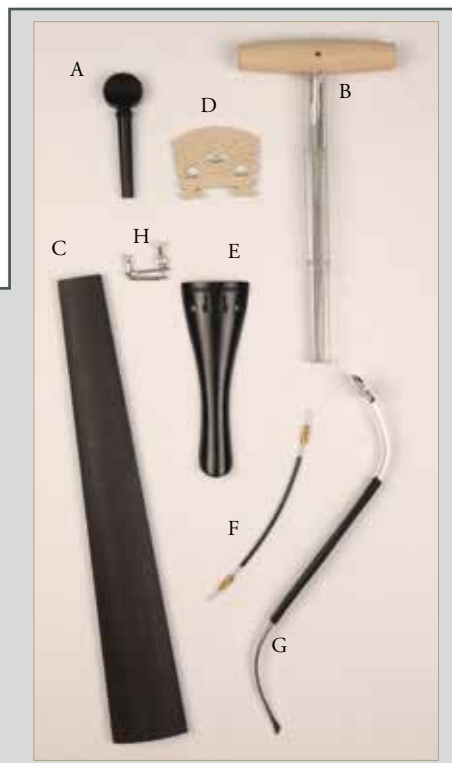

Both of these resources can be found on our website in the library. Just point your browser to:

www.harppkit.com/library

TUNING

ca1

The **Korg CA-1** tuner is inexpensive, accurate, and reliable. Fully chromatic for tuning any instrument. You can't have too many of these around the house!

tunercord

Plug this **Tuner Cord** into your tuner and clip the other end to your instrument. Helps tuning in noisy environments.

ELECTRONICS

ELECTRONICS		
ITEM	DESCRIPTION	PRICE
CA1	KORG ELECTRONIC TUNER	\$26.25
TUNERCORD	CLIP-ON TUNER CORD	22.95
PIEZO1	SINGLE SENSOR PICKUP	69.00
PIEZO2	DOUBLE SENSOR PICKUP	99.00

CORD18	GUITAR CABLE, 18 FT	15.95
CORD03	GUITAR CABLE, 3 FT	8.95

AMPLIFICATION

piezo1

piezo2

Install a **Piezo Pickup** in your instrument and you can plug in to any sound system or amplifier with a standard instrument or guitar cable. Get the single sensor for small instruments or the double sensor for larger instruments.

preamp

Add the **Pure Pre-Amp** and you have volume and tone control that you can clip on your belt. This pre-amp gives your sound a nice boost and more natural tone.

beltamp

The battery powered **Honeytone Belt Amp** is tiny, portable, and fun. Includes both a standard 1/4" jack and a 1/8" headphone jack.

5-1/4" square and 2-1/2" deep

MUSICMAKERS SUPREME COURT - CLASS OF 2016

For the past 16 years I have watched Jerry share his joy and creativity with countless souls. He's been helping people build musical instruments for a long time now and decided the time was right to retire. My wife, Stephanie, and I are thrilled and honored to take on the role of ownership and to continue the work Jerry began 37 years ago.

My background couldn't be better suited to Musicmakers. I enjoy playing an eclectic array of music on guitar and mandolin and I am a complete nerd about lutherie and woodworking. Ask me about how to sharpen a chisel or about bracing patterns on guitars and I'm likely to talk your ear off. I have a background in science education and a passion for teaching and lifelong learning. Basically, if you drew a venn diagram of my passions, Musicmakers would be right there in the middle.

Stephanie has a social services background and has spent the last 15 years working with battered women and homeless mothers. She will be helping out part time in the office as well as continuing to work part time as a family coach. She is excited to get involved in Musicmakers and is particularly interested in the music therapy aspect of what we do.

I couldn't do this alone and I'm thankful I don't have to. We have an amazing team here at Musicmakers. Cody, Mikaela, Matt, and Sharon keep the front office humming while Zach, Tim, and I make the sawdust fly. And Jerry isn't ready to leave quite yet. He'll still be working his wonders 3 days a week.

We have something wonderful at Musicmakers. The experience of building and playing musical instruments is something worth sharing with the world and I'm incredibly grateful for the opportunity to do so.

~Jacob Nelson

How do I place an order?

1. You can place your order online 24 hours a day at www.harpkit.com
2. Place your order by phone during business hours - **800-432-5487**
M-F 8am-5pm Central
3. Copy or tear out this order form and mail it to us at: **Musicmakers**
PO Box 2117
Stillwater, MN 55082

Made in the USA

Walking with a friend in the dark is better than walking alone in the light.

Besides being able to browse our complete product selection and place a secure order 24 hours a day, there are many other reasons to visit our website -

Downloads

Assembly instructions for all of our kits are available for download. This is a great way to get a closer look at the project before you place an order.

Sound Samples

We have many sound samples available online so you can hear what our instruments sound like.

Video Demos

Many of our instruments have a demo video so you can take a closer look. We also have assembly videos for some of our instruments.

Free Stuff

We have lots of freebies on our website including blueprints, a string analysis spreadsheet, several MP3s, a fret calculator, an online tuner, chord charts, and more...

Bargains

Our bargains page is updated regularly with scratch and dent specials, consignment instruments, demo models, and one-of-a-kind prototypes.

Builder's Forum
